Logo Design

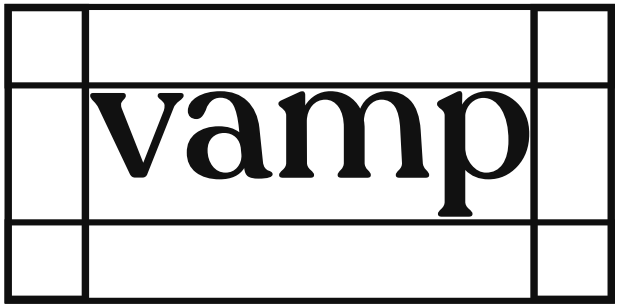

The VAMP logo is a lowercase wordmark that is simple, modern and approachable. It is our only logo and is used for all brand communications. The Vamp logo should always be presented clearly and legibly across all touchpoints.

Color pairings need to be regulated to maintain a consistent brand impression. The Vamp Logo should always appear in either white or black variations. Always be sure there is enough contrast between the background and logo.

For special occasions in film, on photography, or signage, the VAMP logo can be placed on a background colour. In this case, the logo should be placed on a white or black background, depening on which works best at the given time. This should be used only when the logo is placed over an image to help retain legibility.

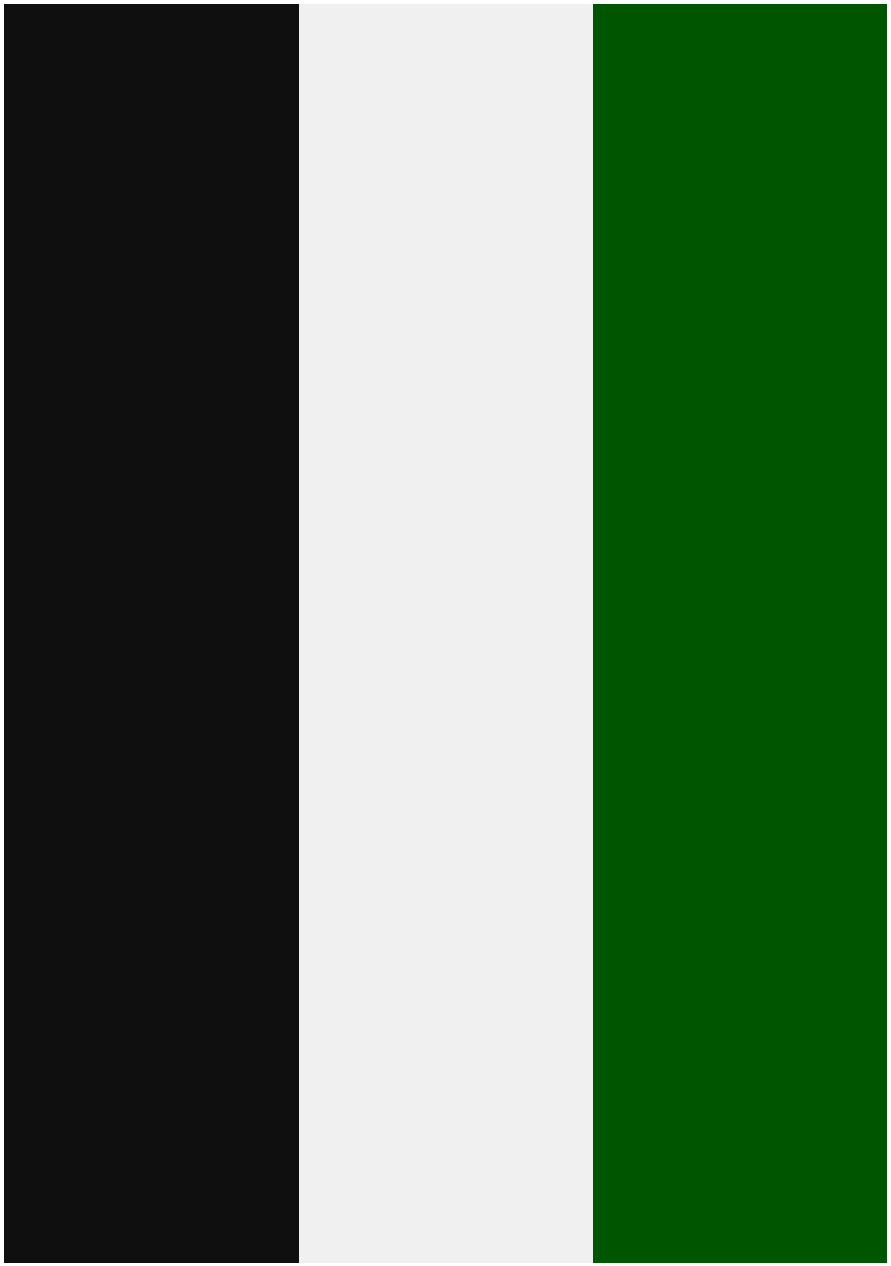

Logo Usage

- Use it on a white or light-colored background (when possible).
- Maintain legibility when using over imagery or dark backgrounds.
- Maintain mimimum clear space all around the logo equivalent to the height of V in vamp.
- The proportion, spacing and placement between each letters should not be changed.

The Vamp logo must never, under any circumstances, be redrawn, modified, or altered in any way. Any misuse of the logo diminishes its integrity and that of the Vamp brand as a whole.

COLOUR PALETTE

Incorporating black, white, and green into the Vamp brand creates a distinctive and appealing mix of feelings and associations:

Black and white are often associated with high-end, premium products which positions the store as a purveyor of quality and exclusivity. The minimalist nature of black and white gives a clean, straightforward, and no-nonsense approach, appealing to customers who appreciate clarity and simplicity.

Black can convey authority and strength, while white can suggest honesty and transparency, together creating a sense of trust and reliability. Also, Black and white are classic colors that never go out of style, which makes the brand appear timeless and enduring.

The combination of black, white, and green can evoke a sense of balance and harmony. Green often represents balance and renewal, which can complement the stability and clarity conveyed by black and white. Green introduces a sense of freshness, vitality, and naturalness. This can be particularly appealing in the context of vaping and smoking, giving a more organic or healthier alternative.

Green also brings a sense of energy, growth, and positivity, counterbalancing the more serious and formal tones of black and white.

Our color palette is simple and in order to maintain consistent brand impression, color pairings need to be regulated.
